What is -- Hipic?

Hipic was initiated by a group of artists. This independent artistic project centering on pictures is promoted by The Shanghai Hipic Culture and Art Ltd.

Hipic offers the opportunity to its users everywhere in the world to unceasingly display their own pictures in synchronization for the spectators' pleasure.

Hipic is a diffusion system connected to all kinds of screen-related media.

What are Hipic particularities?

Six aspects below briefly describe Hipic distinctive features.

Internet
Hipic project, www.hipic.org, as a central system, will receive and display flow of pictures coming from all over the world, and diffuse them on screen-related media.

Endless
After the launching of this project, pictures will unceasingly be displayed on screens at a pace of one picture/minute.

Unique
Pictures of Hipic system will be shown on Hipic once only.

1 minute
Any picture of the system will be offered 1 minute of display.

Screen-related media
The whole world will be able to enjoy this project through internet, softwares, public screens, exhibitions and events, and mobile phones, etc., at the same time.

World synchronization
The diffusion of these pictures will be synchronized everywhere in the world: the same picture will be viewed at exactly the same time in any part of the globe.
